DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

-Species 1 corresponding to an embodiment described in the specification on line 24 of page 5 to line 12 of page 29 and figure 6;

-Species 2 corresponding to an embodiment described in the specification on line 24 of page 5 to line 12 of page 29 and figure 12.

The species are distinct because they have a materially different design and mode of operation. For example, the “determine event type with high frequency of occurrence” and “division point delete process” depicted at S1207 and S1208 in figure 12 of Species 2 is not included in Species 1. Thus, there are different material design and mode of operation between both Species 1 and 2.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an

Art Unit: 2624

allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
